## About Core ICT

Having been in operation since 2015, our experience in implementing IT solutions has helped streamline business processes and transform organizations within the Private and Public sector. Most solutions have been the Schools Management Systems, Hospital Management System. Recently we want to flag off a public education system, currently on its final stage: [www.e-shule.co.ke](http://www.e-shule.co.ke).

It was registered in 2015 under the name Core ICT Consultancy **BN/2015/398298**.

Core Ict Consultancy has a vast experience in implementing mobile, web, distributed systems among others as below:

1. Web Design & Development
2. Custom Web Design
3. Ecommerce Website Design
4. Responsive Website Design
5. Mobile Friendly Website Design
6. Portal, Classified & Directory Website Design
7. Mobile Apps
8. Domain Hosting & Registration
9. Logo Design
10. Search Engine Optimization (SEO)
11. Social Media Optimization (SMO)
12. Pay Per Click (PPC)
13. School Management Systems
14. Hospital Management Systems

## Implementation

Within the 1<sup>st</sup> month we give a prototype of the system which we host and gather feedback from the client in a user centric model. We design it professionally using latest html5 and css3 and related frameworks. We are going to integrate social media (facebook) login API.

As per your requirement integrate payment options using PayPal, card payments like **Visa , MasterCard , Mpesa** through **Pesapal Paybill** and an online shopping cart for e-commerce systems. Hosting for your website will provide you with unlimited mail accounts using the domain that you will choose.

### **Implementation Team**

The foundation of success is in our proficient and talented team of professionals who deliver a pool of extra ordinary expertise in both I.C.T. and management fields. We have proposed a team of qualified staff members to ensure successful implementation of the project. They range from prime and alternate, managerial staff to system consultants.
