# peek a book

## Empower children to make their own reading choices with Peek-A-Book!

Your youngest readers can access hundreds of previews online at your library, at home, or with a smart-phone or tablet device. **Our picture book trailers let them experience the book for themselves** then link to your library's catalog or ebook collections so those items can be put on hold or downloaded.

Library staff can choose to feature up to six books and can change the featured books at any time. Statistics show the most popular book trailers and provide a powerful circulation and marketing tool. Our simple administrative tools make setup a breeze. So sit back, relax, and watch your circulation soar!

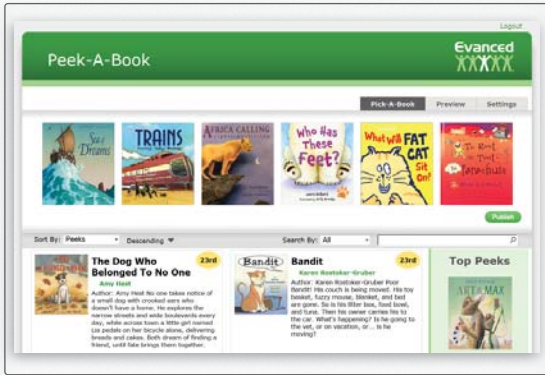

### Peek-A-Book's ever-growing content library features books children love!

Peek-A-Book book previews include Caldecott Winners, perennial favorites, and starred reviews from *School Library Journal* and *Booklist*. With over 300 titles and more added every month, the previews combine images from the book with narration, music and effects to give children a peek at the story without telling them how it ends.
