

My reaction on the movie, “Ghost in the Shell”

By: Dave Labajo Alvarez

The movie entitled, “Ghost in the Shell” was truly entailed with astounding series of events. As a viewer, I could really say that they didn't just try and copy the original, but came up with an original story, which was a better approach. I was so much astonished of how they gave attributes to the different innovations of our media and technologies.

At the very first, I thought it was a horror movie because of its title. However, it provokes that its title is a connotation to let viewers see it into something more than what meets the eye. Well, it is a total package movie. It pervades essence in everything; cognitive, physical, emotional, behavioral, ethical, and moral aspects. It is a very interesting movie and I can assure that nobody will find it boring especially if there is an understanding within the happenings.

The main cast was also a female, that's why it gave so much power especially to the abilities that women could contribute in this world. The characterization was very strong, firm, steadfast, and a very ideal one. I gained positive lessons because of its quality.

I love it! I love everything of it!

Thank you so much for the movie...
