Stay rooted in order for you to bloom!

Hi there! My name is Grace, and I am the co-founder, owner and creator of Filipino Virtual Assistance.

Allow me to encourage you today to stay rooted in order for you to bloom. A lot of us are like this plant, let us assume that this is real, have different ventures in our lives that we want to see blossoming or come into fruition. However, a lot of us are also not seeing it because we don't stay rooted. We try one venture, you know, it might be online freelancing, it might be business, it might be starting a career, a family, or travelling around the world. Whatever those goals or those plans may be, we start on that venture, however if we don't see our very expectations happening, we go and move on to another venture. And then if we don't see the things that we expected again in that venture, we go on and move to another venture again. So, at the end of the decade, at the end of a few years, we're not establishing something; nothing is really accomplished. Why? Because we don't stay rooted.

Just like this plant, in order for the gardener to really see this blossoming, the gardener needs to have this plant planted in the same location. If the gardener would change location and we plant this in another place and then another area after just a few weeks, the tendency is it's not really able to grow. The growth would be disrupted. There would be challenges in adapting to a new situation, and there's even a tendency that it will die. That's the same situation with our ventures in life. If we don't stay rooted, there's a tendency that the challenges on that another venture, or in another venture will not allow us to adapt anymore, and the dreams that we have in our lives to make an impact will die.

I will challenge you today to stay rooted, whatever the ventures that we have or you have in your life, go and stick to it! It might be that it's challenging you, there are growth challenges, there are development challenges, there are things that are challenging you from the inside, from the outside, just stick to it and be rooted in that situation. That will allow you to be more confident, that will allow you to be more strong, that will allow you to blossom beautifully. Why? Because you are in the same situation, you learn from one situation to the other and you can cope with the changes. Why? Because you have been there for years. You have been there in the same situation so if there are new ones, you are able to overcome them. Unlike if you changed a venture to the other, it would be new things all the time, you would be starting from the scratch all the time. And again at the end of a certain period of time, nothing is accomplished, or if there is, it would be very minor, or it would be very small. Why? Because the whole years of changing from one venture to the other is actually just a waste.

I would challenge you today, stay rooted in order for you to bloom.

That would be all for today, I will see you in the next video.

Bye, God bless you all.
