- HIPPA and CITI Biomedical Research Investigators and Key Personnel Basic Course and CITI GCP 2012
- FastTrac®TMTechVenture Program "Recognition of Entrepreneurial Achievement" 2011

University of Louisville, Dept of Neurology projects and other medical writing projects 2010-2016

- Assisting with protocols for Investigator initiated studies. This involves completing the
 comprehensive protocol submission process through the IRIS electronic system, responding
 to subsequent queries and board modifications, amendments to the study protocol and
 following up with yearly study progression report/continuation reports
- Transcribing audio files of detailed patient notes when needed
- Freelance Editing: Kyoto University Hospital helped with editing, assisting with reviewers queries. Please see acknowledgement section: http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3830111/

Providing specific contents for a newsletter for Synapse Biomedical Inc

Medical Writing Manuscripts/publication projects done in Japan (when working with OCC Japan KK) for Clients in Japan and USA

1. File name: The WCP Report

World Congress in Psychiatry Competitive Intelligence Report. International conference held in Yokohama, Japan August 2002. Submitted in my name Product name: Alzheimer's drug. Sold to Client in USA

2. File Name: (AB Draft)

Ghost writing based on the audio file and slide kit of a talk given by a British professor in Japan and touches upon Reminyl. It was subsequently translated into Japanese and published in a Japanese journal in the name of this professor. January 2004 Sold to client in Japan

3. File name: Drug X Proposal

A proposal to a foreign drug company in Japan for SPP (Strategic Publication Planning). This was submitted in Japanese and parts of this were implemented by the company.

4. Scientific Report on Drug X: [Classified]

55 page detailed scientific report with figures based on an advisory board meeting held in Japan (in Japanese and English) to discuss recent progress in treating thromboembolism in Japan and the low molecular weight heparin drug in question. The project was for a client in the USA desiring to market this drug in Japan and was used by the client for internal marketing purposes.

The presentations and discussions were bilingual and since this report had to be done in a tight deadline, I also did the video transcription [Japanese-English] for the conference in order to write the detailed report. Sold to client in USA, March 2004

- 5. **Proposal [Classified]**: to conduct an extensive literature survey of Japanese articles published about Type 2 diabetes for a client in the USA: 18 pages.
- 6. <u>Final Report based on T2DM literature survey</u>: [Classified] The above proposal was accepted by the client in the USA and with the help of a Japanese writer I prepared the final English report (65 pages) for submission to the client for their internal use. The project continued over a span of 6 months. (I also *managed* this project with guidance from the Regional Director of OCC Japan). This document was used by the client to understand the situation of the disease in terms of pathophysiology of the disease in the Japanese and eventually used to promote the drug under development in the USA for the Japanese population as well.
- 7 <u>Contents of Poster for International Conference on Pain held in Sydney in Sept 2005. [17 pages]</u> [Classified]: Written from clinical trial results raw data and study protocol for a client based in the USA (Oxford Pharmagenesis)
- 8. <u>Contents of Poster for PAH (Pulmonary Arterial Hypertension) held in San Diego in June 2006.</u>
 [15 pages with figures and tables] [Classified]:
- 9. Q&A grid to assist client to prepare for FDA advisory committee meeting: CNS drug
- 10. Assisted team in a project with client involving providing contents of slide kit for the FDA Peripheral and Central Nervous System Drugs Advisory Committee

 [Classified]
